Education

German International University (GIU)

September 2025 – June 2028

Bachelor's in Media Engineering Technology

Berlin, Germany

- Continuing Bachelor's program at the GIU Berlin campus.

The German University in Cairo (GUC)

Oct 2023 – Jun 2027

Bachelor's in Media Engineering Technology

Cairo, Egypt

- Admitted with the highest IGCSE score among 980 incoming engineering students.

Projects

Data Integration Interface Demo | C#, SQL Server, .NET, Visual Studio

July 2026

- Engineered a modular data migration tool designed to synchronize complex record sets between disparate database schemas using C# and .NET to simplify customer data onboarding processes.
- Authored custom SQL Server stored procedures and validation logic within Visual Studio to maintain data integrity across relational structures, managing the end to end development of the interface logic.

EventFlow: Multi-Role Event Management Platform | React, Node.js, Express.js, MongoDB, Jira, Git

June 2026

- Built a full-stack event management platform in a team using React, Node.js, and MongoDB on cloud, supporting 5 distinct user roles across 26 user journeys covering organizers, staff, vendors, guests, and venue owners.
- Managed the full development lifecycle using Jira for task tracking and GitHub for version control; designed and seeded a structured MongoDB database with realistic dummy data across all entity types.

MatchDay: Serverless Sports Fan Platform | React, AWS Lambda, DynamoDB, REST APIs

April 2026

- Built a complete full-stack application at the AWS World Sports Innovation Cup 2026, featuring a live-updating React frontend consuming a serverless REST API backend on AWS Lambda and DynamoDB, shipped end-to-end under competition conditions.
- Selected among top 10 teams out of 320+ for the on-site event; recognized at the advanced tier with complete system and API documentation.

JobRadar: Autonomous AI Recruiting Pipeline | Python, Gemini API, Google Cloud, REST APIs

February 2026

- Built a fully autonomous pipeline that discovers, scores, and shortlists job opportunities across hundreds of listings daily, driven by Gemini-powered relevance ranking against custom criteria with no manual input required.
- Designed a multi-source API integration layer handling authentication, pagination, and structured JSON extraction, with results piped into Google Sheets and Drive as live tracking and storage layers.
- Automated end-to-end outreach by dispatching AI-generated personalized emails per opportunity, with idempotent deduplication and incremental queuing for reliable continuous execution.

Experience

Full Stack Web Development Intern

August 2025

Assalam International Hospital

Cairo, Egypt

- Delivered a production multi-role hospital platform in a two-person team using ASP.NET Core MVC, SQL Server, and Razor, owning backend architecture, database design, and all UI/UX decisions on a fixed deadline.
- Led all frontend development and managed the full Git version control workflow throughout delivery.

Teaching Assistant, Computer Science

Feb 2025 – Jun 2025

German University in Cairo

Cairo, Egypt

- Supported 40+ students weekly in debugging and core CS concepts; graded coursework and supervised lab exams.

Volunteering

Event Volunteer, GDG Berlin DevFest

Nov 2025 – Present

Google Developer Group Berlin

Berlin, Germany

- Front-line guest services at one of Berlin's largest developer conferences, covering registration, attendee support, and on-site session coordination.

Camp Helper Leader and Safety Supervisor

August 2024

SGS Scout Volunteering

Cairo, Egypt

- Led logistics and safety for 50+ children across a multi-day camp; recognized for standout contribution and personally invited back for future events.

Technical Skills

Languages: Python, Java, C#, C, TypeScript, JavaScript, HTML, CSS, SCSS

Frameworks: React, Node.js, Express.js, Angular, ASP.NET Core (MVC, Razor)

Databases: MongoDB, SQL Server, PostgreSQL, SQLite

Cloud, DevOps & Tools: AWS Lambda, DynamoDB, Google Cloud, Serverless Architecture, Git, GitHub, Jira

Concepts: REST APIs, JSON, Object-Oriented Programming, UI/UX Design

Human Languages: Arabic (Native), English (Fluent), German (Good)
